

Ionizer Mounting Arm Installation and Maintenance

Made in the
United States of America

Figure 1. Desco [60466](#) Ionizer Mounting Arm

Description

The Desco [60466](#) Ionizer Mounting Arm is designed as a mounting alternative for the Chargebuster® Jr. Ionizer, High Output Benchtop Ionizer and Benchtop Zero Volt Ionizer. The arm allows the ionizer to be mounted off the worksurface, saving valuable work space. The articulated movement of the arm assembly allows the user to focus the ionizer's output directly onto the desired areas. The Ionizer Mounting Arm includes a C-clamp for ease of installation.

The Desco [60466](#) Ionizer Mounting Arm is compatible with the following items:

Item	Description
50663	Benchtop Zero Volt Ionizer, 120 VAC
50670	Benchtop Zero Volt Ionizer, 220 VAC
50690	Benchtop Zero Volt Ionizer, 120 VAC
50691	Benchtop Zero Volt Ionizer, 220 VAC
60505	High Output Benchtop Ionizer, 120 VAC
60515	High Output Benchtop Ionizer, 220 VAC

Packaging

- 1 Ionizer Mounting Arm with C-Clamp
- 4 Screws

Installation

1. Secure the arm to the desired location of the workbench using the C-clamp located at the base of the arm.

Figure 2. Using the C-clamp to secure the Ionizer Mounting Arm to a workbench

2. Remove the benchtop ionizer from its stand, and secure the stand to the end of the mounting arm using the 4 included screws.

Figure 3. Locating the mounting holes on the ionizer's stand

3. Secure the benchtop ionizer back to the stand.
4. Connect the power cord to the ionizer and an appropriate electrical receptacle.

NOTE: The Ionizer Mounting Arm is not compatible with Desco ionizers built prior to 2011. Use the drill pattern below to modify a bracket to fit the Ionizer Mounting Arm.
